The drop off zone will be situated at the western end of the car park and will involve changing the flow of traffic in and outside the car park. A diagram outlining the proposed changes can be seen at the front office and all works will be completed during the school holidays.

### String Soiree

The recent String Soiree performances wowed the audience with the standard this year. From first performances by student Ben Dal Maso, only having learnt the viola for 3 months, to our senior students, Chiara Anderson, Charlie Rank and Daniel Yao; performing pieces from their VCE repertoire mostly from memory.

We even had a cello duo accompanied by drums performing Michael Jackson's 'They Don't Really Care About Us'. We would like to congratulate all the students who performed on the evening.

## LA TROBE UNIVERSITY NEWS –

The **Bachelor of Criminology** is being offered in 2017. Unlike some other criminology degrees, this particular degree will feature **forensics as a core component**. It will also include **Integrated Workplace Learning (IWL)** as a part of the course, giving students the opportunity to use their knowledge, and to assist with future employment.

**ASPIRE**, a well-received and recognised La Trobe initiative for domestic undergraduate school leavers which has been operating for two years now, will continue into 2017 and beyond. The program recognises the **positive impact that a student has had on their local community**. **Community engagement** and **objective school achievement** forms a significant part of the assessment criteria of the program, not ATAR scores.

**Applications** for 2017 entry open on shortly on 1 June and close on 31 August.

See: [www.latrobe.edu.au/aspire](http://www.latrobe.edu.au/aspire).

NOTE: The program has special links with the CFA, the Duke of Edinburgh Award and St Johns Ambulance, however, students with many types of community engagement are encouraged to apply.

## WHERE MIGHT A SCIENCE DEGREE TAKE ME?

- **Are you fascinated by nature?** You can discover more about living things with **biology** and **environmental science** or even **biotechnology** where you can learn about everything from farming to pharmacy products.
- Do you want to be at the **forefront of technology**? A career in **chemistry** allows you to test and produce anything from penicillin to polythene or if you'd like food for thought consider the potential of food science.
- Are you **curious about the universe**? **Physics** looks at the smallest sub-atomic particles and the forces of the universe but if you want to explore a new frontier of science, discover **nanotechnology**.
- Are you intrigued by the **potential of numbers**? **Mathematics** finds patterns and connections and can help to model systems and develop theories and formulas while **statistics** can allow you to predict trends by using data to make conclusions. If you fancy yourself as a **forecaster**, **analytics** can help you see preferences and anticipate actions.
- If **maps and modelling interest you**, this could lead you to a career in **surveying**. Alternatively, find out how location has an impact on the way we interact with the world around us with **geospatial science**.
